Nordic Design

Five times more sales?

It starts with the right display

A sales display stand can increase your previous sales by up to five times. If you currently have the products in a basket or on a table and customers buy them only occasionally, a display stand can help turn them into a much more effective sales opportunity.

The stand presents the products, prices, Finnish origin and care instructions all at once. Customers can see the full selection and easily choose their favourite designs.

Many stores have told us that placing the stand near the checkout works particularly well. While customers are waiting to pay or waiting for a bouquet or gift to be wrapped, they have time to browse the products - and often end up making an impulse purchase.

We offer
several different
display stand options,
so you can choose the
solution that best
suits your store.
